PROJECT EXPERIENCE

REACT MARKDOWN PREVIEWER

It shows realtime Markdown Preview using React JS. A simple project that implements the basic usage of React JS.

TIC TAC TOE

A full fledged 'X' n 'O' game for the web using HTML5, SASS & jQuery. few other games are on Codepen.

CHATROOM

Uses Node JS with Socket.io to communicate in realtime without having to refresh the browser. End users can talk to each other if they are in the same chatroom in real time.

SOCIAL NETWORKING SITE

Provides a REST API, uses MongoDB with Mongoose & many other helper npm packages. It replicates the heart of Facebook & Twitter combined into a single application.

REACT REUSABLE BOOTSTRAP NAVBAR & SIDEBAR

Reusable component made using React. As navbar & sidebar are needed in almost every single web project, I have made it reusable such that anyone can include the component & pass the navbar or sidebar items with their particular background & border colors.

UNOFFICIAL COLLEGE SITE

A simple college site made for students to upload experiments to the MEGA Cloud via using MEGA API. This site was made using ANGULAR JS 1.0 & uses MongoLAB to store database values & Openshift for hosting.

EMAIL VIA GMAIL

Sends email via gmail without authorization & authentication. Useful when websites want to subscribe their users to their mailing list.

& MANY MORE

Some of the projects are closed source but many are open sourced. All my open source projects are on Github & demos on Codepen or Heroku.

USED TOOLS

Brackets, Sublime, Atom & JetBrains IDE's to write any programs/projects. Proficient in using Ubuntu, Windows & Mac OS.

CAREER OBJECTIVES

To succeed in an environment of growth and excellence and earn a job which provide me a job satisfaction and self development and help me achieve personal as well as organizational goals.
